Dedicated Chipper Chute

Model 24-220E features a dedicated chipper chute for easy feeding of large branches up to 30mm diameter.

Mulch for your Garden

Produces beautiful mulch for use in flower beds and around trees.

Pre-Cut System

Hardened steel blades with a pre-cut system allow efficient feeding and cutting. (24-220E model)

Chipper/Shredders Always Hungry For More!

Perfect for composting or creating mulch, you can feed garden waste into our chipper/shredders in two separate ways. Use the dedicated chipper chute for larger branches, or the drop-in hopper for armfuls of brush and debris. At the end of the day you'll find no matter how much you feed our chipper/shredders they'll always be hungry for more.

There are three petrol shredders in the range the 24-463, 24-465 and the 24-350G. The 24-463 and 24-465 have a 5.5hp and 7.5hp Briggs & Stratton engines respectively with 12 reversible and replaceable flails and a 10:1 reduction of volume ratio. There are two hardened steel chipper blades and a high impact plastic rake in chute with integrated handles for easy transportation. A tamper plug is available as an optional extra (731-1617).

The 24-350G Petrol Shredder, with a large slanted hopper, allows easy feed of materials. The unique vibration free cutting ability is via a pre-cut system. The slow cutting blades via the reduction gear gives extra torque and is ideal for small to medium sized branches. The 24-350G comes with easy grip knobs for quick removal of housing for cleaning.

Model 24-220E is a 2000 watt electric shredder with the added benefit of a and separate chipper chute.

Model No. 24-220E

Model No. 24-350G

3.7kW (5hp) Chipper Shredder.

Large Hopper Capacity

The large hopper on the 24-220E and 350G makes it easy to feed.
