

# THE ROYALE

*Simple-to-use height-of-cut adjustment.*

*Blade disengagement lever.*

*The King of ride-ons for classic lawns* – probably the finest domestic cylinder lawn mower in the world, the Royale really is the ultimate lawn mower for the garden lover and fine lawn enthusiast. Being virtually hand-built by a small team of craftsmen, the quality of design, build and finish is unsurpassed, ensuring many years of trouble-free and efficient use. It is available in three cutting widths – 20", 24" and 30" and all with key start.

The six-bladed cylinder can cut as low as 5mm ( $\frac{1}{8}$ ") for an immaculate close finish but can also cut as high as 35mm ( $1\frac{3}{8}$ ") to cater for longer grass.

The steel front roller produces a smooth, even stripe whilst the steel rear roller has a bonded rubber cover to prevent any slippage or damage to the lawn's surface. The handle height is adjustable for maximum convenience and the rear roller can be driven independently of the cylinder, enabling the mower to be driven from lawn to lawn with ease. A special cradle makes the large capacity grassbox easy to roll on and lift off without spilling the grass clippings.

One of the pleasures of owning a Royale is being able to convert it into a ride-on with the unique Atco Autosteer seat, available on all models as an optional accessory. It can quickly and easily be connected and the one-piece padded seat offers supreme comfort whilst mowing. The seat comes with foot rests for increased comfort and manoeuvrability and has been cleverly designed to follow the centre line of the mower path without cutting across flower beds, however sharp the turn. The split steel roller provides stability when turning and the foot brake attachment gives efficient braking from a seated position.

The Royale – truly a king amongst lawn mowers.
