

THE CLUB

The Royale and Club cylinder mowers have always been favoured by the discerning gardener or groundsman requiring perfection in lawn finish and now with the NEW Briggs and Stratton INTEK PRO overhead valve engine the performance is even better. The 6.5hp high power engine offers many new features including, large capacity fuel tank, engine stop switch, engine cut-out system with warning light to prevent starting when oil pressure is low and an integrated fuel on-off switch. If you require the best finish a mower can provide whether in your garden or for bowling greens, cricket pitches or tennis courts the Royale and Club machines are the best that money can buy.

The pride of the greens – for a velvety-smooth finish for bowling greens, tennis courts and cricket pitches, the Club 20 I/C Professional provides the ideal solution. The Atco Club and the Royale are now fitted with the new Briggs and Stratton INTEK PRO 6.5hp overhead valve engine for increased product life. With a 12-bladed precision ground cylinder that cuts as low as 1.8mm ($\frac{3}{64}$ "), the Club 20 I/C achieves a truly impressive 133 cuts per metre.

The Club 20 I/C, with its large fuel tank and light aluminium grassbox, has been designed to give a perfect finish to large areas of turf. It has a micro-set height-of-cut adjustment and adjustable front and rear rollers for an immaculate finish. To safeguard the smooth integrity of the rear roller, transport side wheels are available as an optional accessory.

New Briggs and Stratton engine on Royale and Club machines.
