

Welcome to Qualcast and Suffolk Punch lawn care.

Whatever your type of lawn we have a range of quality lawn care equipment to suit your needs to complete the job quickly, easily and safely so you can relax and enjoy your garden. Choose from a range of hand, electric and petrol-powered mowers to find the product best suited to you and your size of lawn.

Which is the right mower for you?

Choosing the right lawn mower is very important and we can make it easy for you.

The first consideration is: **How big is your lawn?** Try this rough Stride Guide to find out your lawn size assuming an average person's stride is half-a-metre. **Small** lawns can be around 10-20 strides across, **Medium** lawns may be 20-30 strides, whilst **Large** lawns and paddocks would be 30 or more strides across.

What power source? Typically, for smaller lawns, hand-push or light mains electric-powered mowers are popular. For medium lawns, our range of mains electric products will do the job nicely, whilst petrol-powered mowers are a favourite for large lawns and paddocks. Alternatively, you can still use a larger mains electric mower.

S Small lawns – 10-20 strides across*

M Medium lawns – 20-30 strides across*

L Large lawns – 30 or more strides*

Lawnraker

*Assumes a stride is half a metre.

- ⚠ Never use electrical garden equipment in wet conditions.
- ⚠ Wear strong shoes/boots when mowing to avoid injuries to feet.
- ⚠ Ensure your lawn is free from stones and other debris. Flying stones can break glass or hurt bystanders.
- ⚠ Always switch off and unplug electrical garden equipment before checking, adjusting, lifting or cleaning. Only clear grass from blades when the power supply is switched off.
- ⚠ When mowing a lawn, ensure children are kept at a safe distance.
- ⚠ An RCD (Residual Current Device) circuit breaker is a must when using mains electrical products outdoors. This device instantly detects surges in power when cables are damaged and cuts the power supply. A potential life saver.
